

Memo

Thursday May 14, 2015

To: City of Delafield Tree Board

From: Sean Heinzl, City Forester

Re: City of Delafield 2016-2020 Five Year Tree Planting Plan

The goal of this five year plan is to install a larger quantity of trees on an annual basis, more so than has been done in recent years, to utilize monies available from the City's Tree Fund.

The areas of focus are parks and grounds and road right-of-ways. This five year tree planting plan is taking into consideration plant survivability and the Department of Public Works' participation in the care of newly planted trees, I recommend a number of approximately 50 trees to be planted annually with an additional number of 5 trees annually that may need to be replaced or added due to unforeseen circumstances. For the most effective use of labor, trees will be installed in the same general area of the city whenever possible in a given year.

The Department of Public Works will also continue to plant at least one tree annually for Arbor Day.

In regards to monies available in the City Tree Fund, it seems reasonable to preserve a portion of the Tree Fund for future plans where unanticipated tree installation or tree related work may need to be performed. An example maybe in the next five to ten year period where the community will start to realize the extent of potential loss of ash trees due to emerald ash borer. Also, the addition of Liberty Park may also require possible tree installations.

Another potential way to utilize the tree fund, as spaces to plant large quantity of trees become limited within parks and grounds, would be to solicit property owners in the City of Delafield for requests to have a tree planted in the road right-of-way areas adjacent to their property and upon the determination by the City that there is sufficient space and a proper tree can be selected for that site. The requests for trees would be added to a list for future installation.

City of Delafield 2016-2020 Five Year Tree Planting Plan
